Personal Statement

Experienced IT and digital transformation professional with 12+ years of experience in managing enterprise systems, data-driven platforms, and cross-functional digital projects across the public sector and international environments. Proven track record of improving data quality by 35–50%, increasing system adoption to 90%+, and improving reporting efficiency by 40% through structured dashboards and process optimisation.

Strong background in CRM-style system administration, including user roles, workflows, data governance, and reporting tools, supporting business intelligence, pipeline visibility, and operational decision-making. Recognised for delivering measurable improvements in efficiency, reducing manual processes by 25–40%, and enabling better data-driven decisions across leadership teams.

Highly effective in stakeholder management, working with both technical and non-technical teams to drive CRM adoption, improve user engagement, and embed consistent digital behaviours across organisations.

Key Skills & Competencies

- CRM Administration & Platform Management – Managed user access, roles, workflows, and system configuration for 200+ users, increasing adoption from 60% to 90%+.
- Data Quality & Governance – Improved data accuracy and consistency by 35% through data cleansing, validation, and governance practices.
- Power BI, Reporting & Dashboards – Developed KPI dashboards and executive reports, improving reporting efficiency and decision-making by 40%.
- Stakeholder Management – Collaborated with senior leadership, operations, finance, technical teams, and external vendors to deliver digital improvement initiatives.
- Process Improvement & Digital Transformation – Reduced manual processes by 25–40% through workflow optimisation and digital solutions.
- CRM Adoption, Training & Change Management – Delivered user training and support, increasing system adoption and compliance to 90%+.
- Business Analysis & Requirements Gathering – Defined business requirements and delivered solutions that improved operational performance by up to 30%.
- Workflow Automation & System Enhancement – Implemented automation and system improvements, reducing repetitive tasks by 25%+.
- Technical Tools – Power BI | CRM Platforms | Excel (Advanced) | SQL | MySQL | Website/CMS Administration | PMP | Agile.

Work Experience
